Press Release:

Kraft Power Set to Expand its Midwest Territory

WOBURN, MA – Oct 12, 2007

Kraft Power Corporation has recently expanded its territory to include the greater Chicago area, Wisconsin, Michigan and Indiana. The driving force for this growth is Kraft Power's newly acquired Waukesha Engine territory in the northern Midwest that formerly belonged to the Charles Equipment Co. of Illinois. This expanded territory will allow Kraft Power a stronger hold on the power generation market, encompassing 17 states from Maine to Wisconsin.

Two new Kraft Power facilities are beginning to take shape in Chicago, IL and Gaylord, MI that will allow Kraft Power to expand its service capabilities for overhauling engine power systems, as well as providing custom engine systems. These will be full sales, service and parts facilities, offering full support for Waukesha engines used in gas compression, power generation, and cogeneration, as well as related products, engines and power transmission equipment. Sales, service and parts inquiries in these new territories can call 866-713-2152 toll free.

Formed in 1965, Kraft Power has distribution and service agreements with manufacturers including Waukesha Engine, Dresser Inc; Kohler Co.; Deutz Engine; Lister-Petter, Inc.; Mitsubishi Engine North America, Kawasaki Motor Corp., Transfluid, and others. Kraft Power provides engineering support, equipment supply, system integration, and after sale service to customers in markets such as:

- Emergency Power Generating Systems
- Electrical and Mechanical power services for oil & gas production and transportation
- Distributed Power - electrical generation and cogeneration with reciprocating engines
- Diesel Engines for construction, industrial, and agricultural equipment
- Natural gas, biogas, and landfill-gas energy systems
- Rental Power – trailer mounted generator sets
- Power transmission equipment – hydraulic and mechanical couplings, clutches and drive systems

Waukesha Engine is an international manufacturer of stationary natural gas, propane and methane powered engines – and the innovator behind Enginator® System generators. Waukesha is known as a provider of reliable, versatile engine power, a world-class company, and a trusted business partner. Waukesha Engine serves two primary markets: electric power generation & gas compression. Waukesha also supplies engines for mechanical drive applications.

Kraft Power Corporation is headquartered in Woburn, Massachusetts, and has regional branches in New York, New Jersey, Pennsylvania, Ohio, North Carolina and Georgia. The company offers a full range of services – planned and emergency service, equipment overhauls and conversions from each branch. Regional inventories assure high availability and quick response time for repair parts and components.

Inquiries should be forwarded to Lisa Andersen, Marketing Coordinator, Kraft Power Corporation, 199 Wildwood Ave., Woburn, MA 01888, 781-938-9100, landersen@kraftpower.com.
